John Brandews Libendi

Full Stack Developer | Graphics Designer | Document Editor | Generative AI Data Specialist | AI Data Specialist (Voice & Multimodal Annotation)| brandewsj@gmail.com

Portfolio | https://bendypixels.co.ke

Professional Summary

Detail-oriented AI Data Specialist with hands-on experience in high-quality data collection, annotation, and contribution for advanced AI model training across multimodal (video), voice/audio, and speech datasets. Expertise in annotating video episodes for physical AI/computer vision and recording voice data in Swahili and English to enhance multilingual speech recognition, accents, diarization, and inclusive language models. Proven precision in real-world dataset preparation, supporting improvements in AI perception, reasoning, speech understanding, and interaction. Complemented by full-stack development and design skills for creating optimized digital solutions. Passionate about contributing expert human intelligence to frontier AI advancements.

Technical Skills

AI Data & Annotation: Voice/Audio Data Collection & Recording, Multilingual Speech Contribution (Swahili & English), Generative AI Data Annotation, Video/Image Labeling, Multimodal Dataset Preparation, Computer Vision Annotation, Precision Labeling for Speech Recognition & Machine Learning

• Languages: HTML, CSS, JavaScript, Python, PHP

• Frameworks & Tools: React, Node.js, Django, WordPress

• Design Tools: Adobe Photoshop, Illustrator, Figma

• Other: SSO Implementation, RESTful APIs, Git, Document Editing, **Generative AI Data Annotation, Video/Image Labeling

Professional Experience

Freelance Data Annotator (AI Training)

Voice Data Contributor (AI Training - Swahili & English) Silencio AI (Remote) | 2025 – Present

- Contributed high-quality voice recordings in Swahili and English, reading prompts to capture diverse accents, dialects, and natural speech patterns for training multilingual AI models.

- Supported enhancement of speech recognition, diarization, separation, text-to-speech, and context-aware voice AI through accurate, real-world audio data collection.
- Maintained consistency and attention to detail in recordings, ensuring dataset suitability for advanced language understanding and inclusive AI applications.

Atlas Capture (Remote) | 2024 – Present

• Performed high-quality data annotation and labeling on video and multimodal datasets to train advanced AI models, including physical AI and computer vision systems.

• Annotated everyday activities and tasks in short video episodes, ensuring precise labeling for machine learning applications.

• Contributed to improving AI perception, reasoning, and real-world interaction capabilities through accurate dataset preparation.

• Maintained high efficiency and attention to detail in repetitive, precision-focused tasks using platform-specific annotation tools.

Founder & Lead Developer

Bendy Pixels Co | 2023 – Present

• Founded a web-based digital agency providing web design, development, graphics design, and SSO solutions.

• Designed and developed bendypixels.shop, achieving a 20% increase in client engagement through optimized UX.

• Created visually compelling graphics for 10+ clients, enhancing brand identity.

• Implemented SSO solutions for 3 client projects, improving user authentication efficiency.

Projects

Portfolio Website | https://bendypixels.netlify.app

• Developed a modern portfolio using React and Tailwind CSS, showcasing full-stack and design capabilities.

• Achieved 85%+ Lighthouse performance score through optimized assets and code.

Bendy Pixels Website | bendypixels.co.ke

• Built a full-stack agency website with WordPress and custom PHP, integrating e-commerce and SSO features.

• Designed custom graphics and branding, increasing client inquiries by 15%.

Education

Bachelors Degree in Computer Science (Expected)

Chuka university| Expected Graduation: 2026
